Paneda wins new contract in Qatar

Linköping Sweden 2021-12-16

A major broadcaster in Qatar has chosen Paneda as its technical partner for DAB systems. Paneda has delivered a completely new DAB system including redundancy, audio contribution, content system for metadata and distribution components. The system has been realized in a server platform using VMware virtualization. All components are redundant without any single point of failure.

Paneda has recently finalized an onsite training session with the local technicians and performed redundancy tests and other exercises. The complete system is now in operation.

Lars-Peder Lundgren, Sales Director at Paneda says,
“We are looking forward to supply DAB to the region and is a first step to a successful launch of DAB and a long-term relationship. The system we have provided is designed with fully redundancy on all components and we are confident that this system will provide a solid DAB signal for many years”

About Paneda:

Paneda develops and sells DAB+ related equipment on an international market. Up to this date Paneda has delivered over 200 tunnel systems with DAB+ in Norway. Paneda also operates its own digital TV network (DVB-T2) in Norway having over 165 transmitter sites. Paneda continue to expand its market shares on the international arena with its DAB+ Head-End range of components, currently having over 100 DAB multiplexers in operation world-wide. Paneda has also developed emergency warnings systems over DAB+ and offers complete solutions for different kind of such applications.
