Paneda signs DAB systems frame agreement with the Croatian network operator OIV.

Linköping Sweden 2022-03-10

OIV, (Transmitters and Communications Ltd.) the Croatian network provider of national strategic communications infrastructure, and Paneda have signed a long-term agreement for the roll out of DAB+ in Croatia. An initial order has been placed within the agreement based on the Paneda virtual server-based platform and consists of two complete multiplexer systems in full redundancy including multiplexers, encoders, and metadata system. The system is expandable with up to six systems on the same platform.

Johan Ericsson, Sales Manager at Paneda says,

“- We are very happy to support yet another country to roll-out DAB+ and look forward to a long-term relationship with OIV. Furthermore, we are pleased to note that Paneda was awarded in stiff competition where the Paneda system has been evaluated against stiff requirements”.

Igor Likević, Signal Processing Junior Specialist at OIV says:

“- OIV has tested and evaluated several different systems, and where Paneda stands out as a very competent system that is also easy to use and understand. The team behind Paneda shows impressively good support and knowledge”.

About Paneda:

Paneda develops and sells DAB+ related equipment on an international market and continues to expand its market shares with its DAB+ Head-End range of components, currently having over 200 DAB/DAB+ multiplexers in operation world-wide. Up to this date Paneda has also delivered over 200 tunnel brake-in systems with DAB+. In the DAB+ offer there is also an emergency warnings system over DAB+, with complete solutions for different kinds of such applications.

Paneda also operates its own digital TV network (DVB-T2) in Norway having 117 transmitter sites.

About OIV (Transmitters and Communications Ltd.):

OIV – digital signals and networks, the primary provider of national strategic communications infrastructure that offers clients reliable digital networks and platforms for the transmission and transfer of digital signals, distribution of content and fibre-optic network for mission-critical services.

OIV has been providing Croatian citizens with a national strategic broadcast infrastructure, over 95 years for radio and 65 years for television.
