Croatian network operator OIV expands its DAB network with Paneda DAB head-end systems.

Linköping Sweden 2023-07-18

OIV, (Transmitters and Communications Ltd.) the Croatian network provider of national strategic communications infrastructure, expands its DAB network. The new equipment/licenses will cover one additional area, with national and regional services.

Johan Ericsson, Sales Manager at Paneda says,

“- We are very happy to see that DAB is expanding in Croatia. The existing long-term agreement between our organizations is very important for Paneda for our further development, by sharing experiences about DAB in general and development of DAB Croatia in particular.

Igor Likević, Signal Processing Junior Specialist at OIV says:

“- As the initial order last year included powerful servers, it was very convenient to just install and configure the additional multiplexer on the very same server, without disturbing the live operations. The team behind Paneda shows impressively good support and knowledge”.

About Paneda:

Paneda develops and sells DAB+ related equipment on an international market and continues to expand its market shares with its DAB+ Head-End range of components, currently having over 200 DAB/DAB+ multiplexers in operation world-wide. Up to this date Paneda has also delivered over 200 tunnel brake-in systems with DAB+. In the DAB+ offer there is also an emergency warnings system over DAB+, with complete solutions for different kinds of such applications.

Paneda also operates its own digital TV network (DVB-T2) in Norway having 117 transmitter sites.

About OIV (Transmitters and Communications Ltd.):

OIV – digital signals and networks, the primary provider of national strategic communications infrastructure that offers clients reliable digital networks and platforms for the transmission and transfer of digital signals, distribution of content and fiber-optic network for mission-critical services.

OIV has been providing Croatian citizens with a national strategic broadcast infrastructure, for more than 95 years for radio and 65 years for television.
