TRITON Digital orders DAB systems

Sweden & Slovakia 2025-03-12

The system integrator Triton Digital has ordered a complete DAB platform from Paneda. The system has been installed in the Czech Republic for the national broadcaster Broadcast Services (part of the same group as Multiplex24), which is building a DAB network with a total of 31 transmitters. Once completed, the network will cover up to 95% of the population in the target regions.

Additionally, a DAB system has been provided for the regional broadcaster GG Omikron, which is developing a DAB network aimed at covering the three largest cities in the Czech Republic.

The order includes a software platform based on Docker, hosted on on-premises hardware. The solution is designed to support up to 10 multiplexers, which together can host up to 200 radio stations within a 1RU footprint. The platform is delivered and installed with redundancy and seamless switching included

Lars-Peder Lundgren, CEO of Paneda Sweden says,
"Triton has shown great professionalism and understanding of this type of complex installation, and we are impressed by how easy it has been to implement our platform with Triton's support. We are proud to have been chosen as a supplier with our newest, most modern platform that has been appreciated by the end customer. We look forward to DAB continuing its expansion in the Czech Republic, and to continuing to cooperate with Triton."

Miloš Sedláček, Project Manager at Triton says:
"It's a pleasure to work with Paneda. During the project we had several technical challenges, which Paneda easily solved with smart solutions. The support that Paneda demonstrates is impressive and we feel very comfortable in our decision to use Paneda with the most modern and flexible DAB platform, and we look forward to a long collaboration with Paneda."

About Paneda:

Paneda develops and sells DAB+ related equipment on an international market and continues to expand its market shares on the international arena with its DAB+ Head-End range of components, currently having over 200 DAB multiplexers in operation world-wide, furthermore Paneda has also delivered over 250 tunnel systems with DAB+ in Norway. The company also operates its own digital TV network (DVB-T2) in Norway having 100 transmitter sites. Paneda has also developed emergency warnings systems over DAB+ that offers complete solutions for different kind of applications.

About Triton:

Triton Digital was founded in 1992 to enhance digital audio and video processing and distribution. We are the leading technology and service provider to the digital head-ends for audio, video, podcast, and broadcast radio industries. We are an agile, dynamic, and creative team that thrives on solving the unique challenges of audio and video solutions. We believe in working hard and having a lot of fun along the way.
